Cisco UCS Health Check

In today's fast-moving environment, keeping your major systems resilient, efficient, and secure can mean the difference between staying ahead of problems or becoming a victim to them. ANM Insights is designed to assess and identify potential problems in a proactive manner. Gain Insights from ANM's collective engineering experience and tool sets to help you make the most out of (and the least pain from!) your environment.

Solution Overview

ANM Insights: Cisco UCS Health Check provides a technical assessment of your UCS server infrastructure and is designed to identify configuration, security, performance, and availability problems before they might affect your critical operations. ANM will assess your environment through a combination of interactive discussions, tool-based data collection and systems review by an ANM data center expert.
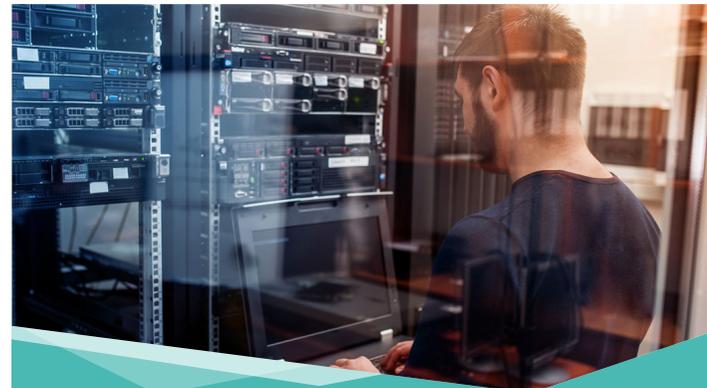

This health check assessment of your Cisco UCS infrastructure includes a review of the following areas:

› UCS Inventory & Lifecycle

› Physical Configuration

› Management Environment

› Firmware & Software Levels

› Server Profile Configuration

› Networking environment utilized by the UCS infrastructure

› Storage environment utilized by the UCS infrastructure

› VMware environment configuration running on UCS infrastructure

Deliverables of the Cisco UCS Health Check includes documentation of the gaps found and corresponding remediation recommendations. This includes pain points around utilization, security, and alignment with best practices. Finally, an architecture planning section will highlight management opportunities and long term roadmap suggestions.

WHAT SETS US APART

› ANM is one of the top data center infrastructure providers in the country with a long history of expertise in Cisco UCS, VMware, networking and data center operations. Our team takes an engineering led approach to problem solving, highlighted by our 6:1 engineering to sales ratio.

› Specific to UCS, ANM is one of a select group of Master Certified Data Center partners with Cisco. This requires not just engineering certifications but specific validated customer engagements and support.

› Unlike many other solution providers, our goal is to proactively identify areas of opportunity in your environment via assessment, as opposed to starting with a product searching for a problem.

FOLLOW-ON SERVICES

› ANM has several in-depth follow-on advisory services that address a broad range of challenges across the entire data center, cloud, and security technology ecosystems. Whether you are planning a cloud migration, disaster recovery strategy, data center consolidation or move, ANM can help guide you through the complexities of planning and rollout.

We'd love to hear from you.
